Recycled cotton cap - 6 panels

# EDITORIAL

In the age of social networking and constantly changing fashion trends, **self-expression is a necessity**. Accessories are **the details that make all the difference** to an outfit and represent our personality.

At Kariban Brands, we believe in the power of individual expression. That's why we've developed our **K-up** brand, **dedicated to headwear and accessories** that let you create your own style through **customisable caps, beanies, hats and even belts**.

Our extensive headwear range offers a wide range of styles, materials and weights. **Each style can be customised, allowing you to design an accessory that reflects your image**. Whether you're looking for a bold cap to express your eccentric side, or a beanie with more subtle detailing to complement your outfit, we have the right pieces to make your plans a reality.

In 2022, we launched **the K-loop project, which is part of an approach based on respect for the environment and traceability**. K-loop is based on the use of **recycled materials and making it possible to track every step in the product's creation** in complete transparency. Our mission is to reduce waste and promote recycling. This promising project has resulted in two collections: **the K-loop collection and the K-loop tracking collection**.

Join the fashion revolution, wear an accessory that reflects your personality and turn your ideas into reality.

Express yourself. Be unique. Wear K-Up accessories.

The K-Up team

## KARIBAN BRANDS

EGL N°165651 / KARIBAN

EGL N°165651 / KARIBAN

The OCS standard checks the presence and proportion of organic raw materials mixed with conventional or synthetic raw materials in an end product. OCS 100 for items designed with a minimum of 95% organic raw materials and OCS Blended for items designed with a minimum of 5% organic raw materials.

EGL N°165651 / KARIBAN

EGL N°165651 / KARIBAN

The RCS standard checks the presence and proportion of recycled content in a finished product. The entire production chain is carefully verified by a third-party organisation to guarantee transparency. RCS 100, with a minimum of 95% recycled content and/or RCS blended, with a minimum of 5% recycled content.

Expertise Vegan Europe, better known under the EVE VEGAN label (registered trademark), is an international monitoring and labelling organisation for vegan products, i.e. animal-friendly and excluding any products derived from animals.

**AT KARIBAN BRANDS, OUR COMMITMENT TO ECO-RESPONSIBILITY IS REFLECTED IN THE CERTIFICATION OF THE TEXTILES AND ACCESSORIES OF OUR SIX BRANDS. THE MATERIALS USED IN THE MANUFACTURE OF OUR PRODUCTS ARE CAREFULLY SELECTED AND SUBJECT TO REGULAR CHECKS IN LINE WITH STRICT CERTIFICATION STANDARDS.**

**THESE LABELS TESTIFY TO OUR COMMITMENT TO OUR ENVIRONMENT, CUSTOMERS AND END CONSUMERS.**

EGL N°165651 / KARIBAN

Global Organic Textile Standard, the strictest certification for textiles made from organic fibres. It tracks the entire production chain starting from the cotton fields: from harvesting to fibre production, garment assembly to the finished product, followed by printing and even export.

EGL N°165651 / KARIBAN

The GRS (Global Recycled Standard) aims to control the recycled content of intermediate and finished products. This involves checking that companies' manufacturing processes, as well as their social and environmental practices, are sustainable and responsible. It guarantees the requirements and accuracy of the certification issued.

The "Confidence in textiles - harmful substances according to Standard 100 by OEKO-TEX®" label is an international certification that meets the needs of stakeholders in the textile supply chain and consumers in terms of health protection. This certification guarantees the absence of harmful substances or those that may present a risk to health and the environment.

Product with the Origine France Garantie label, certification No. 6432564, verifying the traceability of French origin.

# THE K-LOOP PROJECT

Respect for the environment and traceability are the keywords for the K-loop and K-loop tracking collections.

The key approach in this project is the use of recycled material as well as the concept of completely transparent tracking of every step in a product's creation for end consumers.

With "K-loop", Kimood is closing the circular economy loop. This means that the fabrics used in K-Loop products are made from production off-cuts from KARIBAN BRANDS products.

These off-cuts are sorted by colour and shredded to restore the original fibres. They are then mixed with recycled polyester from plastic bottles, which makes the final product even stronger. The main idea behind the K-Loop project is to reduce textile waste, recycling and the reclamation of raw materials.

To ensure that this approach is transparent and verifiable, Kimood has worked on the possibility of tracing these products from design to distribution.

## THE TOTE BAG THAT HERALDED THE START OF THE K-LOOP PROJECT – KI5808

The KI5808 tote bag is the first item to be launched in the K-Loop collection and is made from cotton left over from the manufacture of Kariban cotton t-shirts and polyester from recycled plastic bottles.

# TRACEABILITY: AWARE™ TECHNOLOGY

Discover our K-loop tracking collection, a range that guarantees total transparency at every stage of production. Thanks to blockchain Aware™ technology, you can verify the authenticity of the Polylana® fibre used in our products. Certified Impact Aware™, this fibre ensures total integrity, backed by our commitment to environmentally friendly practices. Simply scan the QR code on our special label to access the Aware™ platform and authenticate certifications via your smartphone. With the Kimood and K-up brands, we are committed to adopting eco-responsible measures such as saving water, reducing waste, recycling plastic, reducing our carbon footprint and ensuring the traceability of our products.

During the weaving process, tiny particles of Aware™ technology are incorporated into the yarn, creating a **distinctive and everlasting fingerprint**. This data can then be easily scanned and consulted.

Our collection is the result of an ingenious fusion between **Aware™ tracers** technology, **Polylana®** yarn (made from recycled polyester and conventional polyester) and **blockchain** (offering secure information storage).

Thanks to a simple scan, it is possible to quickly detect whether genuine certified recycled yarn has been used in a final product (by reading the tracer) and to verify the declarations (such as impact data and mass balance) recorded in the blockchain. The integration of the Aware™ component is adaptable to all types of recycled materials, offering numerous application perspectives. Above all, it guarantees **total commitment and transparency for the end consumer**. This process makes it possible to create a unique and lasting fingerprint for each product.

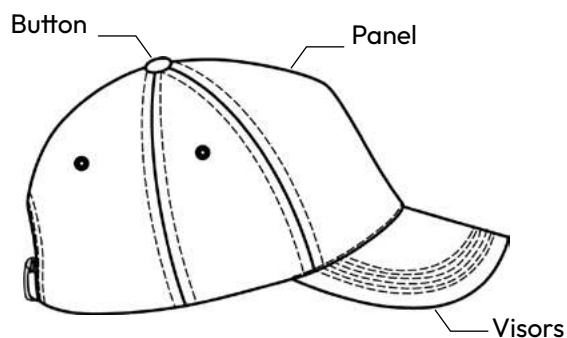

## A RANGE MADE ENTIRELY OF POLYLANA®

Discover our collection made from Polylana® (50% recycled polyester / 50% polyester), an innovative material that makes no compromises on quality or aesthetics.

Polylana® yarn is Impact Aware™ certified, guaranteeing total integrity at every stage of production. Thanks to the Aware™ blockchain platform, you can verify the authenticity of Polylana® fibre. A special label with a QR code allows you to access the Aware™ platform directly and authenticate certifications using your smartphone.

# PANEL GUIDE

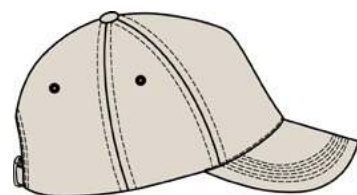

The cap panels are the sections of fabric sewn together to create the crown.

**The number of panels is crucial, determining both the shape and structure of the cap as well as the customisation options, effectively guiding customisation choices.**

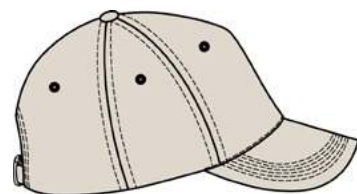

## 5-PANEL CAP

It consists of a front panel, two side panels and two others covering the top and back of the head. A favourite accessory in the world of skateboarding and streetwear, the 5-panel features a spacious front panel that's ideal for affixing designs and logos, making this model particularly suited to screen-printing for a clean, visually striking finish.

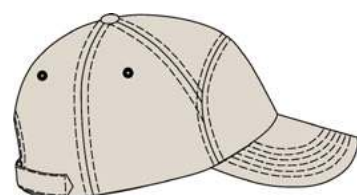

## 6-PANEL CAPS

The iconic, traditional 6-panel cap is inspired by the world of baseball and polo. The centre seam of the front panel can influence the choice of marking location. Perfectly fitted, it moulds to the shape of your head for optimum comfort. In a more classic style, the 6-panel cap is recommended for embroidery branding, thanks to its structure which enhances the finesse and precision of the embroidered motif.

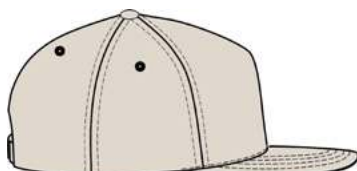

## 7-PANEL CAP

Less common, this type of cap combines elements of the 5-panel and 6-panel caps, with an additional panel on the front, offering a more atypical shape and extra branding space.

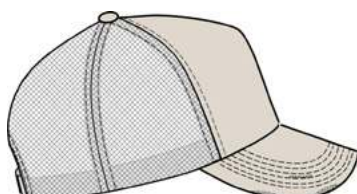

## SNAPBACK CAP

It stands out in the streetwear world with its specific design: a flat, wide peak. Its rigid crown structure offers excellent hold and a large front surface, ideal for visible, high-impact branding.

## TRUCKER CAP

It features a 5- and 6-panel structure, combining a front panel for high-impact branding and a mesh back for excellent ventilation. The sublimation technique is particularly suitable for the front panel.

# MARKING GUIDE

Customised caps offer a blank canvas on which to express your creativity and personality. Whether you want to wear the colours of a sports team, a company, an event or simply add a personal touch to your style, there are many ways to customise it.

## KP227 / "K-loop project" hat

Hat with metal eyelets. This beanie is part of the "K-loop" project. The cotton used comes from manufacturing cut-offs from cotton clothing produced by the Kariban brand, and the KARIBAN BRANDS range. The added polyester comes from recycled plastic bottles. During the recycling process, tracers are added to the yarn as a unique digital fingerprint.
