Dive into
the world of
Native Spirit.

For technical reasons, the colours printed in this catalogue have no contractual value and may differ from reality. Any typographical errors in this catalogue is not binding on Native Spirit in any way whatsoever. Photo credits of this catalogue: Alice Lévêque.

This catalog is printed on 100% recycled paper certified European Ecolabel. This certification guarantees the use of paper through sustainably managed forests or from the recycled chain. Ecolabels make sure that concerned products and services meet with the high level of requirements in terms of ecodesign and respect of the environment, while maintaining their level of performance. The printer of this catalogue is also working in compliance with the «Imprim'Vert» charter, promoting actions to reduce the impact of their activities on the environment: proper disposal of dangerous waste, prohibition of toxic substances, secured storage of dangerous liquids, monitoring of energy consumption and promotion of environmental awareness among both employees and customers.

sustainable collection

Native Spirit is first and foremost a range of customisable essentials, developed with exacting sustainability criteria to make desirable fashion sustainable. Since it was founded, the brand has been committed to designing quality fashionable garments that stand the test of time, meeting the expectations of professionals in terms of eco-responsibility.

The brand develops timeless styles for men, ladies and kids in a palette of colours inspired by nature. Nature plays a part at every stage in our collections' development, guiding our choice of shades, materials and production methods to comply with the need to help make fashion more responsible.

Always innovative and striving for the best, Native Spirit places materials at the heart of the design process and offers garments made entirely from organic, recycled and/or plant-based materials. An ethically and responsibly certified collection, approved by some of the most reliable labels on the market. In 2024, items traceable using Aware™ technology will be included in our selection for greater transparency, offering complete visibility of the production process.

Designed to give free rein to creativity, Native Spirit has developed a complete eco-responsible wardrobe using materials and finishes specifically chosen to facilitate customisation and all types of textile branding. A complete range of 100% no-label blank products, designed to bring the most creative projects to life.

our range

Our collection has been developed to stand the test of time and allow you to create the eco-responsible wardrobe best suited to your project. We've put together a range of 100% no-label essentials for men, ladies and kids that combine durability and quality. On-trend pieces, designed for textile professionals in response to the demand for more environmentally-friendly fashion.

our commitments

As part of an approach based on trust, and to ensure ethical and completely transparent production, we choose to work with production factories that meet certification standards such as WRAP, SA 8000 and BSCI. Our factories are audited by AMFORI to monitor and improve our supply chain. Limiting our impact on the planet through more responsible production is our primary commitment.

our inspirations

Nature influences every step in the development of our collections. From sustainable materials to colours inspired by nature and daily encounters, our creativity comes from the present and past to design the fashion of tomorrow. Our colours are an ode to nature, an invitation to take up the challenge of responsible fashion.

our materials

We've chosen sustainable materials for our wardrobe. 100% of our products are made from organic, recycled and/or plant-based materials. Our materials are certified and quality is our prime concern, so you can be sure that your clothes are eco-responsible.

our certifications

We pay particular attention to the composition of our clothing, which is why we're committed to professionals by offering clothes and accessories that are certified and controlled by strict labels.

We have built a relationship of trust with our partners, carefully chosen for their social, ethical and environmental commitment. All our factories are certified by one or more of these certification labels and are committed to using controlled and approved materials in the production of our collections.

EGL N°165651 / NATIVE SPIRIT

GOTS

The GOTS (Global Organic Textile Standard) certification is the strictest when it comes to textiles made from organic fibres. It tracks the entire production chain from the cotton fields, through harvesting, yarn manufacturing, the finished product before printing, and even clothing export.

EGL N°165651 / NATIVE SPIRIT

OCS 100 & OCS BLENDED

The OCS (Organic Content Standard) certification is dedicated to items designed with a minimum of 5% and a maximum of 94% organic raw materials blended with conventional or synthetic raw materials. OCS 100 contains at least 95% organic materials.

EGL N°165651 / NATIVE SPIRIT

EGL N°165651 / NATIVE SPIRIT

RWS (RESPONSIBLE WOOL STANDARD)

The RWS is a voluntary international standard that addresses animal welfare on sheep farms and throughout the wool chain of custody from certified farms to the finished product.

EXPERTISE VEGANE EUROPE

EVE VEGAN

The EVE VEGAN label guarantees that our products are free from ingredients resulting from the commercial exploitation of animals (products from farming, slaughter, hunting and fishing) and not tested on animals.

GRS

The GRS (Global Recycled Standard) aims to control the recycled content of intermediate and finished products. This is to ensure that the manufacturing process, social and environmental practices of companies are sustainable and responsible.

EGL N°165651 / NATIVE SPIRIT

RCS BLENDED

The RCS (Recycled Content Standard) standard checks the presence and proportion of recycled content in a product. The production chain is carefully verified by a third-party organisation to guarantee transparency. RCS Blended contains a minimum of 5% and a maximum of 94% recycled materials.

OEKOTEX

The "confidence in textiles - harmful substances according to Standard 100 by OEKO-TEX®" label is an international certification that meets the needs of stakeholders in the textile supply chain and consumers in terms of protecting human health. It guarantees the chemical safety of certified products.

SORONA®

Sorona® is a partially plant-based polymer. An innovative material, it used in the padding of our down jackets and is an eco-responsible alternative to replace fur or other animal feather paddings. Sorona® is a trademark registered by Affiliates of DuPont de Nemours, Inc. used under licence.

TENCEL

TENCEL™ fibres (Lyocell and Modal) are eco-responsible materials with a low environmental impact. Derived from wood, these renewable raw materials are produced sustainably and are environmentally friendly. TENCEL™ is a trademark of Lenzing AG.

AMFORI

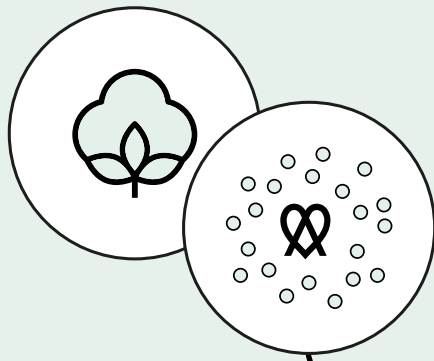

AMFORI monitors our supply chain to improve human prosperity, use natural resources responsibly and promote open global trade.

At Native Spirit, we attach particular importance to the composition and production methods of our garments. From the outset, our aim has been to limit our impact on the environment by adopting a sustainable approach and using certified control labels. To take this commitment one step further, we are developing fully traceable pieces using Aware™ technology, giving access to information about the provenance and manufacturing process of our products.

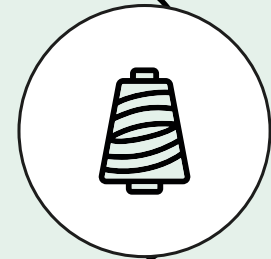

Aware™ is revolutionising transparency in the textile industry by making it possible to trace the life of the product, from its origin to its completion. Right from the start of the production process, Aware™ tracers, which act as a unique fingerprint, are embedded in the raw material. These tracers carry a unique, tamper-proof code, enabling the product to be authenticated by an Aware™ scanner. At each stage of the production chain, the product is checked and scanned, and this information is then entered into the blockchain to generate a digital passport that traces the history of the product. The data is made public by means of a QR code affixed to the product label, giving full visibility of the history of the garment.

A step towards greater transparency in order to establish a relationship of trust as part of our commitment to playing our part in more virtuous fashion.

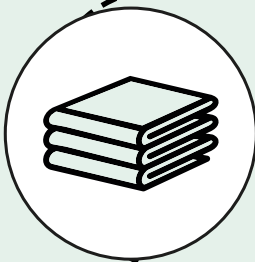

Stage 1 - Tracing

AWARE™ ceramic tracer microparticles are added to the cotton fibre.

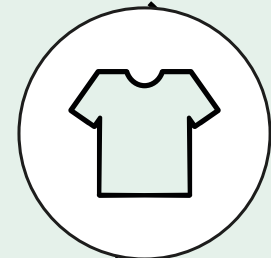

Stage 2 - Spinning

Yarn is spun from the raw material incorporating the AWARE™ tracer.

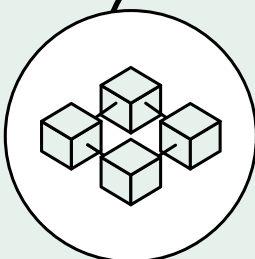

Step 3 - Knitting

The fabric is made from the tracer yarn.

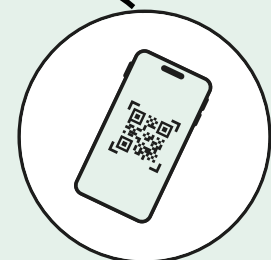

Stage 4 - Production

Design of the final product.

Stage 5 - Scanning

All the information about the final product is compiled and stored on the blockchain (a technology for storing and transmitting information).

Step 6 - Creating the Virtual ID

Consumers can access the garment's digital passport by scanning the QR code on the product label using their smartphone.

dream it wear it

Our collections are designed to give free rein to your creativity. At the heart of range, 100% no-label blank products are equipped with tear-off size tags, ready to adapt to your textile customisation needs.

We highlight different marking techniques to guide you towards the best option depending on the material, weight of the product, quantities to be customised, etc.

At Native Spirit, each garment becomes a canvas and each customisation technique a unique signature.

transfer

Transfer is a flocking system that involves printing the design onto a fusible backing and then transferring it to the textile using heat and pressure. This technique is effective for precise customisation with elaborate designs and offers flexibility for small runs and original artistic creations. This process is less expensive than some others, but should be used with care on materials such as nylon, wool or fleece.

direct to garment (DTG)

Direct-to-garment printing, known as DTG, is an innovative printing method for reproducing all types of decoration. Using a special printer, the ink is applied directly into the fibres of the textile, enabling detailed reproduction of the patterns. This is a fast, high-quality process that we recommend using on fabrics made from at least 70% cotton, for optimum results.

direct to film (DTF)

DTF is an innovative technique that uses film printing to create detailed patterns. After printing on a special film, a hot-melt powder is applied and the design is transferred using heat and pressure. It is suitable for all types of fabric and is popular for its soft, fine feel, resistance and durability.

screen printing

Screen printing is one of the oldest and most popular methods of customisation, decorating textiles by laying ink on the fabric using an openwork screen. Favoured for its superior quality, durability and visual appeal, this time-honoured technique is particularly suited to large volumes and a wide range of materials.

embroidery

Embroidery is a delicate art that involves sewing threads onto fabric to create raised designs. This customisation technique is prized for its timeless elegance, strength and durability. It can be applied to a wide variety of materials, but it is advisable to use textiles weighing at least 180 gsm.

our fabrics

At Native Spirit, the richness of materials and the diversity of weaves and knits play an important role in our collections. That's why we offer a wide range of fabrics, each with its own history and offering different properties. Our carefully designed creations embody our commitment to premium, sustainable textiles.

french terry

French Terry is a knit with an unbrushed inner surface, a looped finish on the inside and a smooth surface on the outside, for lightweight, wearable pieces.

brushed fleece

Brushed fleece is made by brushing the fabric to bring out the fibres, resulting in a soft inner surface. Provides comfort and warmth.

corduroy

Corduroy is the trend of the moment, with its soft texture and varying degrees of ribbing. Popular for its modern, bold style, it is used in clothing and accessories to create an on-trend look. Available in 100% organic cotton in our collection.

piqué knit

Piqué knit has a seductive textured structure, creating raised patterns that combine visual appeal with ease of movement. It offers a distinctive look and great durability.

jersey

Jersey is a soft, stretchy fabric with a regular knit. Its knitted mesh structure offers great elasticity.

sherpa

terry towel

Terry towelling, a trend from the 70s and 80s, is making a comeback in wardrobes. Pleasant to wear all year round, this fabric is absorbent and breathable, as well as being hardwearing and durable.

sherpa

Sherpa is characterised by its soft, fluffy feel, which mimics sheep's wool. Popular for its warmth, it provides cosiness and comfort as well as being fashionable. Our sherpa is made from 100% post-consumer recycled polyester.

combed cotton

Combed cotton is obtained by a combing process that eliminates short fibres and impurities, creating a smooth, strong and durable fabric. It gives a clean surface and a soft touch. The garment is pleasant to wear and gives better print quality.

knit

Knit is the result of a careful interweaving of yarns, creating a delicate texture that combines finesse and suppleness and is assessed according to specific gauge criteria. Depending on the gauge chosen, the knit can be technically adjusted to suit different styles, guaranteeing a timeless, elegant look.

cotton twill

Cotton twill, known for its herringbone pattern due to its diagonal weave, is robust and hard-wearing. Soft to the touch, it produces a garment that combines functionality and durability.

recycled collection

Our fundamental commitment is to create more responsibly, which is why we have developed the Recycled Collection, consisting of pieces made from recycled cotton and polyester to combine fashion and sustainability. This collection, inspired by traditional craftsmanship, showcases our expertise in bringing unique pieces to life. To make this selection of timeless pieces, we recover unused fabric scraps, plastic bottles and materials that have had a former life. Clothes that reflect our desire for more conscious fashion, offering an authentic, sustainable and fashionable collection.

The Recycled Collection is available in four unique colours obtained from recycled materials with no re-dying.

linen

Sustainability is one of our core concerns.

To promote sustainable fashion, we have chosen to develop a selection of garments made from linen, the eco-responsible material par excellence.

This natural fibre, which produces a light, breathable fabric, requires few resources to grow, regulates heat and offers considerable environmental benefits.

Whether knitted or woven, this premium material can be found in a selection of elegant, comfortable essentials for men, ladies and kids.

flowers

A true ode to nature, the floral motif makes its debut in the Native Spirit collection.

This timeless motif has come into bloom in a selection of on-trend pieces and is available in four prints to brighten up our eco-responsible wardrobe. These floral decorations are in line with our creative cycle, celebrating the thing most dear to us, our planet, by inviting you on a journey through its most beautiful landscapes.

IN CONVERSION COTTON

Cotton said to be "in conversion" is cotton grown according to organic standards in its transition period and is certified organic in conversion. It maintains and/or improves soil fertility and uses less water and energy than conventional cotton.

SLUB COTTON

Fancy yarn with irregularities.

LSF

Low Shrinkage Fleece: high quality fleece with low shrinkage. The inner and outer faces of the fabric contain a continuous filament that offers excellent resistance to washing. The outer face is perfect for printing, while the inner face is extremely comfortable.

LST

Low Shrinkage Terry: high-quality French Terry treated to significantly reduce shrinkage, perfect printing, excellent comfort.

PRE-CONSUMER RECYCLED MATERIALS

Materials that come from waste generated during a manufacturing process. Excluded is the reuse of materials that come from a production process and that can be recovered in the same process that generates them.

POST-CONSUMER RECYCLED MATERIALS

Materials that come from consumption waste generated by households or by industries and businesses in their role as end-users. This includes returns of materials from the distribution chain.

MICRO TWILL

Ultra-fine weave made of thin and flexible yarns that brings style to the material and movement to the garment.

RIP-STOP

A square arrangement of warp and weft threads to prevent the propagation of tears.

WATER REPELLENT

Water-repellent fabrics are fabrics that have been treated to repel water. Water then runs off in droplet form and cannot soak into the fabric, preserving breathability.

WATERPROOF

Waterproof garment or fabric. The figure shown refers to the water column, in other words, the fabric's ability to resist water pressure without allowing moisture to penetrate. The minimum standard is a water column of 1300 mm/m².

LYOCELL

Artificial cellulose fibre for a peach-skin feel, among other things.

ENZYME WASH

A cleaning process using enzymes to improve the appearance of the fabric, removing excess fibres from surfaces to achieve a perfect printing surface and a very soft feel.

MODAL

Modal is an artificial fibre of natural origin obtained by spinning wood cellulose fibres.

SORONA

Sorona® is a polyester microfibre consisting of approximately 38% plant-based fibres, principally from maize. Popular for its softness, strength and insulating properties, this durable material perfectly imitates animal feathers and faux fur.

The Native Spirit size guide for men, women and children will help you choose the right size and create an eco-friendly wardrobe suited to your body type.

Take your measurements on the body itself, without over-tightening. If you're between sizes, go for the larger size.

Measure the breasts at the fullest part and, if possible, with your bra on.

Measure the waist at the narrowest part of the waist.

Measure the hips at the widest part of the hips.

Measure the legs from the top of the crotch to the ground.
