## STANDARD EN ISO 13688

EN ISO 13688 specifies general performance requirements relating to the ergonomics, safety, size designation, ageing, compatibility and marking of protective clothing, as well as the information to be supplied by the manufacturer with protective clothing. It is intended to be used only in conjunction with other standards containing requirements for specific protective performance and is not intended to be applied alone.

## INTERNATIONAL STANDARD EN ISO 21420

Standard EN ISO 21420 defines the general requirements and test procedures relating to glove ergonomics and construction, resistance of constituent materials to water penetration, safety, comfort and effectiveness, marking and information provided by the manufacturer applicable to all protective gloves.

## NF EN 17353 STANDARD

Standard NF EN 17353 specifies the requirements for enhanced visualization equipment in the form of clothing or devices capable of visually signalling the user's presence. Enhanced vision equipment is designed to make its users more visually perceptible in moderate risk situations, whatever the conditions of daylight or illumination by vehicle headlights or spotlights in the dark. Performance requirements are given for colour and retroreflectivity, as well as for the minimum surface areas and positioning of materials used on protective equipment.
